PROFESSIONAL SUMMARY

Human Resource Management graduate with a Business Administration background and project-based experience in payroll workflows, employee records, and administrative systems. Combines HRM knowledge of payroll and organizational processes with freelance software development experience supporting business operations. Skilled in confidential information handling, structured records, administrative coordination, and translating business needs into digital workflows. Seeking HR administration, payroll, records, or operations support roles.

CORE HR & ADMINISTRATIVE COMPETENCIES

– HR administration and employee records support
– Payroll workflow and deductions process understanding
– Staff data handling and confidentiality
– Administrative coordination and document management
– Recruitment and onboarding process support
– Reporting, data organization, and record accuracy
– Business process and operational workflow understanding
– Professional communication and stakeholder support

TECHNOLOGY ADVANTAGE

– HR and payroll systems: familiarity with employee records, salary processing, and deductions workflows.
– Digital information management: experience with structured records, databases, user access, and reporting workflows.
– IT operations: Linux Administration and practical IT support awareness.
– Process improvement: identifying repetitive work and translating business needs into digital system workflows.

HRM KNOWLEDGE APPLIED TO BUSINESS WORKFLOWS

Human Resource Management Studies and Payroll Workflow Practice | 2021–2024

Applied HRM knowledge to payroll and administrative system projects, focusing on how employee information and routine processes can be organized clearly.

– Applied HRM concepts to employee records, salary processing, and deductions workflows.
– Considered validation and reporting steps that can help support accurate payroll administration.
– Translated HR and business needs into clear digital workflow requirements during project work.

FREELANCE SOFTWARE ENGINEERING EXPERIENCE

Freelance Software Developer | Project-Based Engagements | 2019–Present

Completed freelance and independent software development assignments, building systems around different business and operational needs.

– Payroll Management System (Laravel, MySQL): developed workflows for salary processing, deductions, and employee records.
– Pharmacy Management System: developed stock and sales workflows; JAYTRIX Sales Management System: specified sales, inventory, and reporting workflows.
– RGC Tanzania Management Platform: contributed to administration and user-access workflows. JaytrixMarketplace and Service Marketplace Platform (source available): contributed to commerce, booking, and transaction workflows.

EDUCATION

Bachelor of Business Administration (BBA) | Tanzania Institute of Accountancy (TIA)

Study focused on business operations, administration, strategic planning, and decision-making. This foundation helps me understand organizational needs and how digital systems can support day-to-day work.

Diploma in Human Resource Management | Tanzania Institute of Accountancy (TIA) | 2021–2024

Study covered HR operations, payroll, employee records, and organizational workflows. This knowledge supports my understanding of digital payroll and employee-record systems.

How these qualifications connect to technology: The BBA provides a view of organizational goals and operations, while HRM adds knowledge of employees, payroll, and staff records. Together, they help connect people and business processes to digital tools that support them.

Secondary Education | Kitefu Secondary School | 2017–2020

Alongside my secondary school studies, I developed my technology skills by independently learning programming outside the classroom.

Primary Education | Dolly Primary School | 2008–2016

During primary school, I focused on my studies while beginning to develop an interest in technology.

SUITABLE ROLES

HR Officer / HR Assistant; Administrative Officer; Payroll Assistant; HR Systems Support; Records Officer; Operations Assistant; IT-aware Administrator; Digital Transformation Support.

PROFESSIONAL STRENGTHS

– Organized and attentive to accurate records.
– Understands confidentiality and responsible handling of staff information.
– Able to communicate with both business users and technical teams.
– Interested in improving administrative workflows with appropriate digital tools.
– Willing to learn organizational policies, HR procedures, and assigned systems.
